

“With Blowtherm, we didn’t have to purchase additional fans and blowers to get the air flow we needed.”

“I talked with three other shops that had Blowtherm equipment and visited another facility to see the booth in action and I liked what I saw. The long and short of it is everyone else wanted to sell me a booth, but then sell fans and blowers on top of it, which is not the case with Blowtherm’s Air Speed system.”

“The ease of operation with this booth has allowed us to increase from 6 to 8 booth cycles per day. This has boosted shop production which equals direct profit. Our insurance business has expanded rapidly due to greater volume output capability.”

“Our painters can monitor the heating and cool down settings which make this booth more user friendly than most products I’ve seen and lends to a substantial savings on utilities.”

“Our distributor, Autoquip, delivered what was promised. There was a real comfort level with the entire shipment and delivery process.”
